SCIENCE AND TECHNOLOGY (S&T)

Basic, Applied, and Developmental Laboratory and Non-Laboratory Research including Laboratory Surety Operations

Subject Matter Expertise in Chemical, Biological, Radiological and Nuclear Defense (CBRND) and Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR)

Specialized Technology Market Surveys, Capabilities Development and Methods Development and Optimization

Technology Readiness Assessments of Commercial Off-The-Shelf (COTS) and Emerging Technologies

Integration of Science and Engineering Principles for Prototype Development

TEST AND EVALUATION (T&E)

Full Spectrum Developmental and Operational T&E Strategy Development, Support, Execution and Documentation

Identification, Development, and Validation of Standardized T&E methods

Laboratory Oversight of Third Party T&E Activities for Data Quality

Development, Coordination, and Approval of T&E Master Plans (TEMPs)

Software Testing, Integration, Validation and Verification

Design of Experiments (DOE) and Statistical Analyses

Reliability Growth Planning and Readiness Analysis

ACQUISITION AND ANALYSIS

Subject Matter Expertise in Strategic Planning Initiatives and Requirements Development

Development of Acquisition Plans and Documentation

Acquisition Assessments such as:

- Manufacturing Readiness Assessments (MRA)
- Analyses of Alternatives (AoAs)
- Risk Assessments

Acquisition Logistics, Configuration Management and Sustainment

Expertise in the Application of DoDI 5000.02 Principles

Policy Development
